PROFILE

I am a Front-End developer with more than 3 years of experience in the IT industry, specialized in building websites and applications in agile environments. I have a strong background in React, Next and React Native, and I am recognized for my ability to solve problems efficiently and improve customer satisfaction. In addition, I have extensive knowledge in search engine optimization strategies and am committed to the highest standards of user experience, usability and speed. As an effective communicator and proactive collaborator, I am passionate about designing intuitive and responsive customer-centric interfaces. My skills in web design and strategic development of innovative platforms drive business growth and ensure optimal results.

EXPERIENCE

FRONTEND DEVELOPMENT ENGINEER
Techno Apes
From September 2022 to April 2024

- Led a dynamic team of 4 talented developers, driving innovation and delivering high-quality solutions in challenging logistics and maritime projects.
- Collaboration in teams to develop and maintain applications using React.js, Next.js and React Native in logistics and maritime projects.
- Implementation of good development practices, including testing, acceptance of pull requests (PRs) and code documentation.
- Coordination of deployments and maintenance, focusing on managing microfrontends for a client with multiple partner companies.

JUNIOR FRONTEND DEVELOPER
Devices & Technology
From March 2022 to September 2022

- Develop the user interface for one of the client's service stations using technologies such as React, Redux, React query, in order to improve and ensure the optimal use of the application.
- Oversee Pull Requests and creation of technical and functional documentation, promoting code quality and collaborative development.

JUNIOR FRONTEND DEVELOPER
WOW Desarrollos Digitales
From January 2022 to March 2022

- Application development using React, Next.js and React Native.
- Collaboration in development teams for web and mobile projects.
- Experience integrating APIs and backend services.
- Ability to troubleshoot and optimize application performance.
